Rivalta (RE), January 2002

With reference to the international situation and to the trend of our market concerning marble, granite, stone, ceramic and glass, our company – acting against the current trend – has no intention of increasing the prices of its silicon carbide and natural diamond products, or at least not until the market conditions are less worrying than they are at present.

We believe that this policy of ours will help our customers' economical position too, keeping in mind that our primary objective is to guarantee maximum quality of our grinding wheels.

Confident that you will appreciate what we are doing, we send you our best regards.

BIGGI ABRASIVI S.n.c.
Di Biggi Vincenzo & C.
